Allowable Subject Matter

1. Claims 1-20 are allowed.

Claim 1 is independent claim.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the present invention from the application discloses a print engine/controller chip configured to be coupled with **others** to drive a **multi-segment printhead** comprising a printhead interface to output the composite strip to a printhead in which “the printhead interface including a multi-segment printhead interface outputting printhead formatted data, and a synchronization signal generator outputting a synchronization signal to couple print engine/controllers to synchronize their respective strips at the printhead”. The closest prior art such as Silverbrook et al. (US Patent No. 6,447,113 B1), which is from IDS filed on 5/31/06, discloses a plurality of the print engine/controllers (i.e., both of CCPs in fig. 30) linked by inter-CCP interface, each has a printhead interface to a separate printhead. However, the prior art of Silverbrook, including an updated electronic text search, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
